Shade on Demand

Enhance the Comfort of your Home with Retractable Awnings and Solar Screens

Is your deck or patio unbearably hot on sunny afternoons? Retractable awnings from Classic Coverings and Design are the solution, providing shade at the touch of a button. Both beautiful and functional, retractable awnings turn your deck or patio into an attractive and comfortable living space, while adding value to your home. They provide a high level of UV protection, and greatly reduce solar heat gain, indoor temperatures and cooling costs, making your awning a wise investment with lasting value. We represent Eclipse Awning Systems, manufacturer of top quality retractable awnings, available in widths up to 40 feet and projections up to 16'-6", sufficient to cover just about any patio or deck. For those on a budget, we also represent SunSetter awnings, and exclusively offer woven acrylic fabrics like you find on Eclipse and other custom-made awnings.

Do you have to close your window shades or blinds to block the hot Central Oregon sun, and lose your view in the process? Solar screens from Classic Coverings and Design block the sun, but not your view! Made from a fabric that you can see through, they mount either on the interior or exterior of your home. When mounted on the exterior, solar screens shade the windows and block up to 90% of the heat gain, which can reduce indoor temperatures by up to 25°F and cut your cooling costs. Shades mounted on the interior block less heat, but are still very effective at shading the interior and protecting interior furnishings. Both interior and exterior solar screens typically block 85% to 95% of sunlight and UV radiation, while preserving your view.
